

**Amendments to the Specification:**

On page 5 of the Specification, amend the paragraph starting on line 3 as follows:

Embodiments of the present invention will be described hereinafter, by way of example only, with reference to the accompanying drawings in which like reference signs relate to like elements and in which:

Figure 1A shows a fan grill in accordance with an embodiment of the present invention;

Figure 1B shows a side view of the fan grill shown in Figure 1A;

Figure 2A shows a fan grill in accordance with an embodiment of the present invention;

Figure 2B shows a side view of the fan grill shown in Figure 2A;

Figure 3A shows a fan grill in accordance with an embodiment of the present invention;

Figure 3B ~~shows~~ illustrates a side view of two of the grills shown in Figure 3A stacked together;

Figure 3C ~~shows~~ illustrates a side view of several of the grills shown in Figure 3A stacked together – for clarity, the outermost loop of each grill is not shown in this Figure;

~~Figure 3D shows a fan grill, according to an embodiment;~~

Figure 4 shows an alternative embodiment of the handle of a fan grill in accordance with an embodiment of the present invention;

Figure 5 shows an alternative embodiment of the handle of a fan grill in accordance with an embodiment of the present invention; and

Figure 6 is a schematic representation of a fan module with a fan grill.

On page 9 of the Specification, amend the paragraph starting on line 23 as follows:

Turning now to Figure 3A, there is shown a grill 10 that has a substantially planar portion 90 in which an opening 94 is provided. In addition to an outermost ring 48, the substantially planar portion 90 of grill 10 shown in Figure 3A comprises four partial loops 54/56, and 50/52, which are attached to the struts 60 and 62 respectively. The opening 94 is defined by struts 60

and 62 and also by the portions of the outermost ring 48 proximal the mounting formations 68 and 72 (see also grill 110 in Figure 3D).

On page 10 of the Specification, amend the paragraph starting on line 8 as follows:

The opening 94 in the substantially planar portion 90 of the grill 10 ~~is~~ may in some embodiments be provided with the intention that a number of grills 10 ~~such as that described here~~ may be stacked in a space efficient manner. In such embodiments, ~~The~~ opening 94 and the handle 100 are arranged such that when two or more grills 10 are stacked together, the handle of each grill 10 can pass through the opening of the next grill 10 in the stack. This arrangement is shown in Figure 3B, in which handle 100 of the lower grill is shown as extending through an opening in the upper grill. Depending upon the dimensions thereof, each handle 100 may in fact pass through the openings of a number of grills 10 when more than two grills are stacked together. This is illustrated in Figure 3C, which shows a stack of several grills 10. In Figure 3C, the substantially planar portion 90 of each grill 10 has been omitted for clarity of the diagram. From Figures 3B and 3C it can be appreciated that the provision of the opening 94 affords significant savings in terms of packaging space and materials when a number of grills 10 are shipped together.
